14th Flying Training Wing Public Affairs

Several local retirees came to the Columbus Club for the annual Retired Chief's Luncheon April 5 at Columbus Air Force Base.

"The purpose of the event is to have a relationship between

our active duty chiefs and our retirees," said Chief Master Sgt. Rita Felton, 14th Flying Training Wing Command Chief . "This is a great community effort that I have enjoyed since arriving here and I feel it helps bridge the gap between where we are in today's Air Force and where it was then."

#### RETIREES

(Continued from page 1)

Strengthening relations with retirees brings many unique opportunities to Team BLAZE Airmen that Felton can't help but acknowledge.

"My favorite part is still hearing the stories," Felton said. "It's always something new and more exciting than the last. Just to see the look in their eyes as the express their history is exciting. It's a joy to know we are part of such a great enterprise."

The event brought in more than 10 local

retirees from the Columbus community.

"Unfortunately as members get older some are unable to come or maybe unaware but with our retiree office recently stood up we are able to get more participants," Felton said.

After a meal, some stories and news about future events, the event concluded.

"I just think these type of opportunities where we get to mesh with our retiree population means a lot to them," Felton said. "When you get an opportunity to see them, take a moment to just talk to them and hear their stories because they will never forget and neither will we."

## 49th FTS Graduates IFF Class 16-FBC

2nd Lt. Ragus, Cezary Jan

Six members from class 16-FBC graduated Introduction to Fighter Fundamentals April 1. This phase of their training sets them on their way to becoming fighter pilots and Weapon Systems Officers in the Combat Air Forces of the United States Air Force.

The 49th FTS is responsible for active duty, guard, reserve, and international flying training in the T-38C IFF aircraft. The 49th FTS provides training to fighter pilots and Weapon Systems Officers entering Air Force major fighter weapons systems, which include the A-10C, F-15C, F-15E, F-15S, F-16 and F-22.

The nine-week course begins with tac- wingmen.

Capt. Brendan Lanphear

tical formation flights and then introduces pilots and Weapon Systems Officers to basic fighter maneuvers and air-to-air employment in offensive, defensive, and high aspect fight scenarios. Wingmen bound for aircraft with an air-to-ground attack capability then move on to basic surface attack and surface attack tactics phases learning to employ ordnance against ground targets. The skills learned during IFF directly translate to the fighters these wingmen will fly in their follow-on

Congratulations to the following fighter

training and employ in combat.

# Carter announces Operation Inherent Resolve Campaign Medal

Produce Pilots, Advance Airmen, Feed the Fight

DOD News, Defense Media Activity

WASHINGTON — Service members who serve or have served in Iraq or Syria as part of Operation Inherent Resolve will receive the Inherent Resolve Campaign Medal, Defense Secretary Ash Carter announced March 30 in Tampa, Flor-

Carter announced the new medal during the U.S. Central Command change of command ceremony. Army Gen. Lloyd I. Austin III transferred the command's flag to Army Gen. Joe Votel.

"It is fitting then, that as we mark the change of command between these two leaders, that we introduce the Inherent Resolve Campaign Medal," Carter said. "I am pleased to announce today, by the president's order and upon the chairman's and my recommendation, that our Sailors, Soldiers, Airmen and Marines serving in Iraq and Syria as part of Operation Inherent Resolve are now eligible for this medal and distinction."

#### Medal retroactive

The medal is retroactive to June 15, 2014, and is for ser- Dawn, officials said.

vice members based in Iraq or Syria, those who flew missions over those countries, and those who served in contiguous waters for 30 consecutive days or 60 nonconsecutive days,

The medal distinctly recognizes service members battling terrorist groups in Iraq and Syria. Service members who were killed or were medically evacuated from those countries due to wounds or injuries immediately qualify for the medal, as do members who engaged in combat.

Previously, the Global War on Terrorism Expeditionary Medal recognized service in Iraq and Syria, and service members in neighboring countries such as Turkey will continue to

The president establishes campaign medals for large-scale and long-duration combat actions or operations. Inherent Resolve meets the criteria, officials said. The entire operational area has been subject to lethal combat operations. U.S. forces are executing an extensive air campaign in the region. A U.S. division-plus force is providing command and control, intelligence and other advisory services.

The medal is separate from the Iraq Campaign Medal earned for service during operations Iraqi Freedom and New Defense Secretary Ash Carter announced the creation of

the Inherent Resolve Campaian Medal March 30, 2016.

# C-17 drag reduction testing aims at saving fuel

Kenii Thuloweit

412th Test Wing Public Affairs

EDWARDS AIR FORCE BASE, Calif. From testing synthetic biofuels to "vortex surfing," Edwards Air Force Base is on the forefront of finding new ways to cut fuel costs for the Air Force.

The latest venture is currently underway at the 418th Flight Test Squadron where a test team of Air Force and Boeing personnel recently completed the first phase of Air Force Research Laboratory's C-17 Drag Reduction Program.

According to an AFRL study, the price the Air Force pays for jet fuel has quadrupled between 2004 and 2012. At the same time, the demand for personnel and equipment to be transported around the world has increased. Airlifters like the C-17 Globemaster III, C-130 Hercules and C-5 Galaxy use most of the Air Force's fuel -- 70 percent in 2012. Of these cargo planes, the C-17 uses

The purpose of the C-17 Drag Reduction Program is to collect data on how airflow is affected with different modifications done to

The modifications are scheduled for different phases using Vortex Control Technologies "Finlets" and Lockheed Martin microvanes and fairings. The ultimate goal is to see which, if any, modification reduces drag and thus fuel consumption.

"The C-17 in one of the highest consumers of jet fuel in the Air Force," said Capt. Kevin Meyerhoff, a test pilot with the 418th Flight Test Squadron. "A reduction of just a few percent can result in significant cost

The first phase consisted of putting six VCT Finlets on the aft part of the fuselage. The test aircraft for the program is a C-17 on loan from Joint Base Lewis-McChord,

Test sorties for Finlets 1 configuration were completed in March to determine how the C-17 performed with the modification.

Although the goal is to reduce fuel consumption by increasing airflow efficiency and reduce drag, it has to be done without negatively effecting what the C-17 can do

"The cost savings these devices may offer are entirely dependent on the C-17 still being able to fulfill its mission in the Air Force," Meyerhoff said. "Our testing focused any impacts that the devices may have on

The first phase of C-17 Globemaster III drag reduction testing consisted of putting six orange Finlets on the aft part of the fuselage. A C-17 on loan from Joint Base McChord-Lewis, Washington, is the test plane for the program. With three Finlets on each side, test sorties were conducted to see how the C-17 performed with the modification.

the flying qualities of the aircraft. This includes the C-17's ability to perform critical

Base, Ohio, to see if any of the modifications increase streamlining and reduce drag. After that, Air Force leaders will ultimately The next phase of testing will add five tached to locations on the wings near the decide whether or not any of the modifications should be implemented throughout the

"Our end goal is to reduce fuel consumption while maintaining military utility" said Steve Salas, a 418th FLTS project manager. "This program has the potential for signifi-The flight tests at Edwards AFB are the cant savings in C-17 fuel costs, helping the Air Force stretch its budget even further,

Testing is scheduled to be completed in

# **BLAZE Hangar Tails: C-12J Huron**

The C-12J Huron is a twin turboprop aircraft used for cargo and passenger airlift. The aircraft is a military version of the Raytheon 1900C regional airliner. In addition to providing cargo and passenger airlift, the aircraft is capable of transporting two litter or ten ambulatory patients during aeromed-

#### Features

The C-12J can carry 19 passengers or up to 3500 pounds of cargo. The fuel capacity of the C-12J is 675.2 gallons with refueling accomplished directly into each of its four fuel tanks through filler caps located on the top of each wing. The safety and operational capabilities of the C-12J are increased by the autopilot, color weather radar and tactical air navigation system, as well as high frequency, very high frequency and ultra high frequency radios.

The aircraft has a crew of two and may be flown from either cockpit seat. The C-12J fleet recently finished an extensive avionics upgrade and modernization program, which added three multi-function displays able to display all essential navigation information to the pilots. Additionally, three integrated Global Positioning Systems, two Flight Management Systems, a new autopilot, VHF/UHF communications radios and weather radar were installed

#### Backaround

Delivery of the C-12J fleet began in July 1992. The U.S. Air Force currently operates four C-12J aircraft; three of these aircraft are operated by the 459th Airlift Squadron at Yokota Air Base, Japan, and one is operated by Air Force Material Command from Holloman Air Force Base, New Mexico.

#### **General characteristics**

**Primary Function:** Passenger and cargo airlift

**Prime Contractor:** Raytheon Aircraft Company (formerly the Beech Aircraft Corporation)

Propulsion: Two Pratt & Whitney PT6A-65B turboprop engines, each with a four-blade, full-feathering, reversible composite propeller, generating 1,173 shaft horsepower (3,400 ft-lb of torque) on each engine

Length: 57 feet, 10 inches **Height:** 14 feet, 11 inches Wingspan: 54 feet, 6 inches Maximum Takeoff Weight: 16,710 pounds Maximum Speed: 284 mph

Ceiling: 25,000 feet Fuel Capability: 675.2 gallons; 1,035.2 gallons with ferry

Maximum Range: 1,450 nautical miles, 1,669 statute

Maximum Load: 19 passengers or 3,500 pounds of cargo Crew: Two (pilot and co-pilot)

Date Deployed: July 1992

**Inventory:** Active forces, 4; Air National Guard, 0; Air

# Taking the Air Force Core Values to a Professional Level

Lt. Col. Austin Hood

14th Communications Squadron Commander

As the old saying goes, "Amateurs practice until they get it right; professionals practice until they can't get it wrong."

In his book, The Power of Professionalism: The Seven Mind-Sets that Drive Performance and Build Trust, Bill Wiersma proclaims professionals hold themselves to a higher standard. He also says professionalism is more about who you are and less about what kind of work you do.

Because Air Force core values are such a big part of who we are as Airmen, we owe it to ourselves to bring our understanding of these core values beyond an amateur's perspective to a professional's perspective. An amateur's perspective peaks at being able to recite the three Air Force core values of Integrity First, Service before Self, and Excellence in all we do. While this works great as a quick reminder, it falls short of guiding us more precisely on how to act every day. A professional's perspective involves an understanding of the Air Force core values with its defining virtues, and through decisions and actions, living them on and off duty.

In August 2015, the Air Force introduced its pamphlet, "America's Air Force: A Profession of Arms," (found at e-publishing.af.mil/shared/media/document/AFD-150826-047.pdf) as an evolution to the "little blue book," which initially captured the Air Force core values. The pamphlet illustrates the Air Force core values with its defining virtues that we demand perfection in everything from everyone).

The Airman's Creed

I am an American Airman

I am an American Airman

A tradition of honor,

And a legacy of valor.

Its sentry and avenger.

I am an American Airman

Wingman, leader, warrior.

I will never falter,

And I will not fail.

I am an American Airman

I have answered my nation's call.

My mission is to fly, fight, and win

I am faithful to a proud heritage.

Guardian of freedom and justice,

I defend my country with my life.

I will never leave an Airman behind

My nation's sword and shield,

I am a Warrior.

- one is watching
- Honesty: requires us to evaluate our performance expertise, and elbow grease of all Airmen. against standards, and to conscientiously and accurately report findings. The service member's word must be unques-
- Courage: not the absence of fear, but doing the right thing despite the fear.
- Accountability: individuals maintain transparency, seek honest and constructive feedback, and take ownership of the outcomes of their actions and decisions.
- Service before self: professional duties take precedence over personal desires.
- Duty: the obligation to perform what is required for the mission. Our sense of duty is a personal one and bound by the oath of service we took as individuals.
- Loyalty: an internal commitment to the success and preservation of something bigger than ourselves. Our loyalty is to the Nation first, the values and commitments of our Air Force second, and finally to the men and women with whom
- **Respect:** treating others with dignity and valuing them as individuals
- Excellence in all we do: continuously advance our craft and increase our knowledge as Airmen (does not mean

- Mission: mission focus encompasses operations, prod-— Integrity first: doing the right thing, even when no uct and resources excellence. The complex undertaking of the Air Force mission requires us to harness the ingenuity,
  - Discipline: an individual commitment to uphold the highest of personal and professional standards. Airmen commit to a life of discipline and self-control. We demonstrate it in attitude, work ethic, and effort directed at continuous improvement, whether it be pursuing professional military education or nurturing ourselves physically, intellectually,
  - Teamwork: essential to triumph at every level. Airmen recognize the interdependency of every member's contributions towards the mission and strive for organizational excellence. We not only give our personal best, but also challenge and motivate each other.

With this richer context of the Air Force core values, an Airman can take deliberate steps to practice a better application of the core values in their day-to-day actions. By accepting the challenge of living the Air Force core values on and off duty, Airmen develop professionally and contribute to a culture of trust where all Airmen can bring out their best. The Profession of Arms Center of Excellence website, airman.af.mil, contains a wide array of tools and knowledge for Airmen to professionalize their perspective on the Air Force core values and practice it until they can't get it wrong.

# Eielson selected to receive operational F-35A aircraft

Secretary of the Air Force **Public Affairs** 

WASHINGTON — Eielson Air Force Base, Alaska, was selected as the new home for the Air Force's first operational overseas F-35A Lightning IIs.

Air Force officials chose Eielson AFB after a lengthy analysis of the location's operational considerations, installation attributes, environmental factors and cost.

"Alaska combines a strategically important location with a worldclass training environment. Basing the F-35s at Eielson AFB will allow the Air Force the capability of using the Joint Pacific Alaska Range Complex (JPARC) for large force exercises using a multitude of ranges and maneuver areas in Alaska," said Secretary of the Air Force Deborah Lee James. "This, combined with the largest airspace in the Air Force, ensures realistic combat training for the (Defense Department)."

Proximity to the IPARC will enable the Air Force to take advantage of approximately 65,000 square miles of available airspace for realistic, world-class training in the Air Force's most advanced fifth-generation fighter.

The decision culminates a

currently scheduled to begin arriv-Preliminary estimates had the

new aircraft arriving a year earlier but officials say the 2020 arrival will provide the Air Force more time and grow its active-duty maintenance force.

"The Air Force is facing a shortage of experienced, active-duty fighter aircraft maintainers as we transition from legacy aircraft to the F-35A," said Lt. Gen. John B. Cooper, the deputy chief of staff the Air Force for logistics, installations and mission support. "Adjusting the initial plan and slightly accelerating F-35A arrivals at Burlington Air Guard Station, Burlington. Vermont, to fall 2019 will allow the service to stick to the overall F-35 rollout schedule, while capitalizing on the Air National Guard's experienced fighter aircraft maintenance force as we put additional measures in place to increase the number of

The F-35A, manufactured by Lockheed Martin, is a fifth-generation fighter aircraft intended to be the Air Force's premier strike aircraft through the first half of the 21st century. It is a multi-role fighter that is expected to eventually replace the service's legacy air-to-

trained active-duty maintainers."

# April issue of Airman magazine now available

Airman Magazine Staff

FORT GEORGE G. MEADE, Md. — The April issue of Airman magazine is now available to download and is viewable through a Web browser.

Featured on our cover, "The perfect storm" gives a birds-eye view of the F-35 Lightning II as it goes through rigorous testing and evaluation in order to be declared initial operational capability within the projected deadline later this year.

Next, we follow a maintainer and his jet from the battlefield to the bonevard in "Struck by the

In our final feature, the past mingles with the present during a heritage flight experience at Davis-Monthan Air Force Base, Arizona

version is viewable in Web browser format.

mote tour. The briefings are held daily at the A&FRC. Pre-deployment is at 9:30 a.m., and post-deployment is at 1:30 p.m. Please contact A&FRC, 434-2839/434-2790 for more information.

#### Survivor-Benefit Plan

Are you nearing military retirement? The one decision you will need to make before you retire involves participation in the Survivor Benefit Plan. As with all good decision-making, you need to know the facts before you can make a sound decision, and be wary of anyone telling you they can offer you a better deal. Always get the true facts about the SBP before making up your mind. Additional details are available by calling (662) 434-2720.

#### Military and Family Life Consultant Program

The MFLC counselors provide non-medical counseling to help Airmen (both single and married), their spouses and other family members to cope with stressful situations created by deployments, reintegration, and life challenges such as martial issues, parenting, career stress and anger. All consultants are licensed mental health providers. Counselors can meet either on or off base. There is no charge for services and appointments can usually be made within one to two days. To contact the MFLC, call 662-364-0504.

#### **Volunteer Opportunities**

If you are interested in volunteering please contact the Airman & Family Readiness Center. # SUPT Class 16-07 earns silver wings

Capt. Daniel J. Petrella KC-135R, Scott AFB, III.

T-1, Columbus AFB, Miss.

2nd Lt. Steven Bretscher Indianapolis, Ind. KC-135R, Grissom ARB, Ind.

tired, is the graduation guest speaker. Students will receive their silver pilot's wings at the ceremony, and students who excelled in their respective training tracks are recognized.

2nd Lt. Austin Hornsby, T-38, and 2nd Lt. Michael Thomas, T-1, received the Air Education and Training Command Commander's Trophy for being the most outstanding students overall in their classes.

The Air Force Association Award was presented to 2nd Lt. Matthew Croghan, T-38, and 2nd Lt. Dan Bailey, T-1. The award is presented to a graduate in each flight who ex-

celled in training and typified the tenets of the association; promoting aerospace power and a strong national defense.

Nineteen officers have prevailed during a year of training, earning the right to

2nd Lt. Austin Hornsby, T-38, and 2nd Lt. Michael Thomas, T-1, were named the distinguished graduates of SUPT Class 16-07.

The 52-week pilot training program begins with a six-week preflight phase of academics and physiological training to prepare students for flight. The second phase, primary training, is conducted

in the single-engine, turboprop T-6A Texan II at Columbus AFB, Mississippi Students learn aircraft flight characteristics, emergency procedures, takeoff and landing procedures, aerobatics and formation flying. Students also practice night, instrument and cross country navigation flying.

Primary training takes approximately 23 weeks and includes 254.4 hours of ground training, 27.3 hours in the flight simulator and 89 hours in the T-6A aircraft.

After primary training, students select, by order of merit, advanced training in the fighter-bomber or airlift-tanker track.

> Both tracks are designed to best train pilots for successful transition to their follow-on aircraft and mission.

> Advanced training for the fighter track is done in the T-38C Talon, a tandem-seat, twin-engine supersonic jet. T-38 training emphasizes formation, advanced aerobatics and navigation. Training takes approximately 26 weeks and includes 381 hours of ground training, 31.6 hours in the flight simulator and 118.7 hours in the T-38C aircraft.

The airlift-tanker track uses the T-1A Jayhawk, the military version of a multi-place Beech Jet 400 business jet. F-16, Holloman AFB, N.M.

Instruction centers on crew coordination and management, instrument training, cross-country flying and simulated refueling and airdrop missions. Training takes about 26 weeks and includes 185 hours of ground training, 53.6 hours in the flight simulator and 76.4 hours in the T-1A.

Each class is partnered with business or civic organizations during their year of training. This program is designed to foster closer ties between the community

and Columbus AFB. Today, each student will be given a set of pilot wings with their names engraved on the back as a token of good luck from their partners. SUPT Class 16-07 pilot partners are Stark Woodstock, Ga. Aerospace and Columbus Main Street.
