News Briefs

Wing Newcomers Orientation

A Wing Newcomers Orientation is scheduled for 8 a.m.-1 p.m. Aug. 29 at the Columbus Club for newly arrived active-duty and civilian personnel.

Enlisted Promotion Ceremony/ Staff Sergeant Release Party

The next Columbus Air Force Base Enlisted Promotions Ceremony is at 3 p.m. Aug. 31 at the Columbus Club and will be immediately followed by the staff sergeant release party. Open to all.

AETC Family Day

An Air Education and Training Command family day is Sept. 1. The family day is in conjunction with the Labor Day holiday, Sept. 4. Most Columbus Air Force Base offices will be closed.

Inside

Feature 8

The 14th FTW Leadership Structure is highlighted in this week's feature.

The graduation speaker for SUPT Class 17-14 on Sept. 8 is Gen. James Holmes, Air Combat Command Commander.

U.S. Air Force photo by Airman 1st Class Keith Holcomb

Retired Col. Todd Phinney, during his last assignment he was the Chair of the Leadership and Warfighting Department at the Air War College at Maxwell Air Force Base, Alabama, speaks to Specialized Undergraduate Pilot Training Class 17-13 Aug. 18, 2017, on Columbus Air Force Base, Mississippi. SUPT graduations occur every three weeks; for every class that graduates, another class begins.

Phinney stresses importance of teamwork, leadership during graduation address

Airman 1st Class Keith Holcomb

14th Flying Training Wing Public Affairs

Retired Col. Todd R. Phinney, during his last assignment he was the Chair of the Leadership and Warfighting Department at the Air War College at Maxwell Air Force Base, Alabama, spoke to Specialized Undergraduate Pilot Training Class 17-13 here Aug. 18.

At the start of his speech Phinney congratulated the newest Air Force aviators and expressed to them that though their undergraduate pilot training is complete because of their hard work and dedication, no pilot earned their wings on their own.

He then gave a personal testimony about the first time he dropped bombs from his aircraft during a combat mission.

Submission Deadline

The deadline for submitting copy for next week's SILVER WINGS is noon Monday. Articles may be dropped off at the public affairs office or e-mailed.

Published by the Commercial Dispatch Publishing Company, Inc., a or endorsed by, the U.S. government, the Department of Defense or the Department of the Air Force.

The appearance of advertising in this publication does not constitute endorsement by the DOD, the Department of the Air Force or Service Publications, Inc., of the products or services

Everything advertised in this publication shall be made available for purchase, use or patronage without regard to race, color, religion, sex, national origin, age, marital status, physical handicap, political affiliation or any other non-merit factor of the burchaser, user or patron.

Editorial content is edited, prepared and provided by the 14th Flying Training Wing Public Affairs Office of Columbus AFB,

The SILVER WINGS staff reserves the right to edit or rewrite all copy submitted when necessary. All photos are U.S. Air Force photos unless otherwise stated.

Submit all advertising to the Columbus, Miss., Commercial Dispatch advertising department one week prior to desired publication date. The advertising department can be reached at (662) 328-2424.

Upcoming

CPR Classes are offered at Baptist Golden Triangle, 6:00 p.m., in the Patient Tower. Pre-registration is required. September classes will be held on the 11th and 25th. Call the Education Department at 244-2498 or 800-544-8762, ext. 2498.

Jeanette Manning with Behavioral Health will discuss Drug and Alcohol **Addiction** at Baptist Golden Triangle's free community education luncheon Tuesday September 5, noon-1p, rooms 4 & 5 PT, near the Gift Shop. Lunch provided. Seating is limited; call 662-244-1132 to register by Aug. 29.

Baptist offers **FREE mammograms**, thanks to a grant from the Komen Foundation to area women who are age 35 or above, have no insurance coverage for mammograms and who live in Lowndes, Oktibbeha, Clay, Monroe or Chickasaw counties. Call 244-2979 to see if you qualify.

Baptist Cancer Center holds a support group for cancer survivors and their families the third Friday of every month from noon-1pm. The next meeting will be held Sept. 15, room 5PT, past the gift shop. Relaxation is the topic and we will discuss the importance of having physical, emotional and spiritual releases. For information call 244-2923 or 800-544-8767, ext. 2923.

Doctor Peter Tofts, pulmonologist, will discuss Ways to Stop Smoking at Baptist Golden Triangle's free community education luncheon Thursday, September 28, noon-1p, room 5 PT, near the Gift Shop. Lunch provided. Seating is limited; call 662-244-1132 to register by Sept. 21.

Baptist Cancer Center offers **free prostate PSA screenings** for men over 40. Screenings will take place every other month at the Columbus location. The October 27th PSA screenings will be held from 8-11:45am and from 1-2pm. Make an appointment by calling at 244-4673 or 800-544-8767, ext. 4673.

Join us for a weekly education/support group meeting for people with **congestive heart failure** at Baptist Golden Triangle. Program runs on a 6-week cycle, you may begin at any time. Held each Thursday, 11am-noon, Outpatient Pavilion Board Room. For information call 244-1953 or 244-2132.

Baptist Golden Triangle offers childbirth classes each month. Classes are held each Tuesday night at 6 p.m. To pre-register call the Education Department at 244-2498 or 800-544-8762, ext. 2498.

BMH-GT **Diabetes Support Group** - classes are the 3rd Wed. each month, 10-11 am, room 6 PT. For more information call Lacy Smith at 244-1392 or 800-544-8767, ext. 1392.

Baptist Golden Triangle is seeking carring, compassionate people to join an elite group of volunteers to help in a variety of hospital settings. For more information, call 244-1165.

> For more information contact the numbers listed above or email info.goldentriangle@bmhcc.org.

News Around Town

The 2017 Island Paddle Fest is scheduled for Aug. 26 at the Columbus River Walk. Registration starts at 7 a.m. Register online at islandpaddlefest.org. The first race will start at 9 a.m. and will be a 5.5-mile

Sept. 1

The 22nd Annual Black Prairie Blues Festival will be from 5-11:30 p.m. Sept. 1 at Mary Holmes College in West Point, Mississippi. Tickets are \$20 in advance and \$25 at the door. For more information, visit www.wpnet.org/indes.php/attractions/howlin_wolf/blues_festival or call 662-295-8361

Sept. 2

The 39th Annual Prairie Arts Festival will be from 9 a.m.-5 p.m. Sept. 2 in downtown West Point, Mississippi. The festival will include fine arts, crafts, down-home southern cooking, four stages of live music, classic cars, kidsville and much more. More than 600 exhibits will be featured. For more information, visit info@westpointms.org.

The Mississippi State University football team will face off against Charleston Southern University at 3 p.m. Sept. 2 at Davis Wade Stadium in Starkville, Mississippi.

Sept. 16

The Mississippi State University football team will face off against Louisiana State University at 6 p.m. Sept. 16 at Davis Wade Stadium in Starkville, Mississippi.

BARGAIN LINE

The deadline for submitting ads is

noon Monday before the desired publication date. Ads turned in after the deadline will run the following week. Ads can be mailed to or dropped off at the public affairs office in the 14th Flying Training Wing Headquarters building, e-mailed to silverwings@ us.af.mil or faxed to 434-7009. Calling Ext. 7068 by noon Monday can extend the run date of ads already submitted. Silver Wings reserves the right to limit ads based on content, space and frequency of requests. Advertisements for private businesses or services providing a continuous source of income may not appear in the Bargain Line. They may, however, be purchased through The Commercial Dispatch, 328-2424.

Transportation

For sale: Baby mattress for \$5; large coffee table with two door for \$25; ChromaHarp still in the box with instructions book, tuning tool and picks for \$40; several folding knives with assisted-open blades for \$10 each; fixedblade hunting knife with gut hook \$8; fixed-blade boot knife \$8; two drawer file cabinet for \$5; foot stool for \$5; Smith Corona type writer for \$10; two straight-back chairs for \$5 each; miscellaneous pieces of jewelry up for price discussion. If interested, call Raymond Gross at 662-244-5861.

For sale: A black, electric, four-burner Whirlpool stove, asking \$100. A black, side-by-side Frigidaire refrigerator, include ice maker, ice and water dispenser through the door, asking \$150. If interested, call Kathy Mostella at 662-594-1214.

Produce Pilots, Advance Airmen, Feed the Fight

LANDING

(Continued from page 13)

possibility and now he was going to land it."

Shallow approach. Not too fast. Minimal flare.

On the A-10, the two main landing gear wheels are exposed, even when in the up position. It is part of the combat resiliency of the aircraft. And so, Capt. Brett DeVries landing his 'Hog, right in the middle of the runway in a near textbook landing — caught on video by another pilot who was on the ground at Alpena.

"I flew him down, calling out his altitude," Vickers said. "He came in flat, I mean it was a very smooth landing."

"Capt. DeVries skills as a pilot were put to the test in this incident," said Brig. Gen. John D. Slocum, the 127th Wing commander and himself a seasoned fighter pilot. "He demonstrated not only superior skill as a pilot but remained calm in an extremely challenging situation. To walk away from this scenario with no injuries is a true testament to his abilities as a world-class fighter pilot."

After watching DeVries land, Vickers was directed to return to home station at Selfridge

"That's probably only a 35-minute flight, but it just felt like hours," Vickers said

After flying alongside DeVries during the landing, Vickers circled the field and saw his fellow Red Devil exit the aircraft on his own and run to the fire truck.

U.S. Air National Guard photo by Terry Atwell

Capt. Brett DeVries (right) and his wingman Maj. Shannon Vickers, both A-10 Thunderbolt II pilots of the 107th Fighter Squadron from Selfridge Air National Guard Base, Michigan. Vickers helped DeVries safely make an emergency landing July 20, 2017, at the Alpena Combat Readiness Training Center after the A-10 DeVries was flying experienced a malfunction.

"And I am thinking, did this just happen? That was the longest flight ever back, to Selfridge," he said.

"There is a reason why we train as a two-ship or greater," said Col. Shawn Holtz, Commander of the 127th Operations

Group and an A-10 pilot. "We rely on each other and need to have mutual support within the flight. Maj. Vickers was the definition of what a Wingman should be in this flight. He stuck with Capt. Devries and did everything in his power to see this through to a safe landing. Both of these pilots demonstrated not only superior flying skills, but represent the type of teamwork and professionalism that should be the goal of every Attack Pilot."

In all, the flight lasted about 25 minutes from the time the canopy blew off until landing, though it felt longer to the two pilots in the air. An investigation is underway into the cause of the original malfunction. Thanks to DeVries' skills in landing the aircraft, the damaged Warthog is expected to be able to eventually be returned to flying status. As for his fellow Airmen, the 107th as a whole stood down from flying for several days, but have since returned to regular flight ops.

Slocum said the two men will be submitted for appropriate recognition for their superior Airmanship during the July 20 flight. DeVries also received an email congratulating him from Gen. David L. Goldfein, the Air Force Chief of Staff.

"Again, I want to stress the training," DeVries said. "Sometimes, perhaps we think, 'Why do we have to do this training again and again?' Well, in this case, the training took over and it is what made the difference.'

The A-10 is still at Alpena where it is being repaired and will return to the flying inventory at Selfridge.

PHINNEY

(Continued from page 1)

During a deployment to the Middle East, while flying a combat sortie, he had a decision to make after identifying a surface-to-air missile that put coalition forces in danger. He could either continue with the original mission, or destroy the SAM that may be jeopardizing other's safety in the area. He fired his munitions and destroyed the SAM.

Upon his return from a successful mission, he said he remembered seeing the crew chief of his aircraft dancing, happy with the mission's outcome; not realizing the crew chief was happy that the aircraft he put hundreds of hours into maintaining and preparing worked and saved allies' lives that day.

"It wasn't until later I understood why he was dancing," Phinney said.

He said a lot of work is put in behind the scenes that a lot of people won't see or hear about, and without it, the success of that mission wouldn't have been possible.

"It is an honor and privilege to wear the wings, and we get out as the tip of the spear, but there is a whole shaft on that spear,' Phinney said. "There are so many unsung heroes from the day that I dropped bombs that will never get the excitement or praise."

U.S. Air Force photo by Airman 1st Class Keith Holcomb

Graduates of Specialized Undergraduate Pilot Training Class 17-13 look at the American flag Aug. 18, 2017, on Columbus Air Force Base, Mississippi, before singing the Air Force Song. From start to finish the SUPT program takes about 13 months and students will have flown roughly 200 hours in training aircraft at Columbus AFB upon graduation.

He reminded the new pilots to remain humble and understand they are part of a pected to be leaders; they are officers, and now they're pilots," Phinney said. "On any

"These young officers from 17-13 are ex-

given day we are both followers and leaders, even Col. [Douglas] Gosney as the wing commander will be a follower at some point during every day."

Phinney said mastering the art of being a follower, learning the trade, watching other leaders, and building a toolkit from those lessons learned will make individuals and Airmen the best leaders they can be.

In the graduating class was 2nd Lt. Trevor Phinney, SUPT Class 17-13 graduate and son of the retired colonel. Phinney had the opportunity to pin on his son's wings during the ceremony.

"I really wanted Trevor to pursue whatever he wanted in life," his father said. "I am proud of him for choosing to serve our nation; I'm ecstatic for him because I know the opportunities the Air Force is going to provide for him and the other pilots."

Also graduating from the same class was 2nd Lt. Caleb Fisher, grandson of Medal of Honor recipient Maj. Bernie Fisher.

The major was the first to receive the Air Force Medal of Honor in 1967 for his heroic acts during the Vietnam War. He was assigned to the 14th Special Operations Group, which was stationed in Vietnam at the time.

Columbus AFB to celebrate Air Force Birthday

Airman 1st Class Beaux Hebert

14th Flying Training Wing Public Affairs

Columbus Air Force Base will celebrate the Air Force's 70 years of excellence during this year's Air Force Birthday Ball

This year's ball will start at 6 p.m. Sept. 15 at the Trotter Convention Center in Columbus, Mississip-

Social hour starts at 6 p.m. with dinner following at 7 p.m. The menu consists of beef, chicken and vegetarian options. Alcoholic beverages will be avail able, but can be purchased with cash only.

A moment to honor and remember prisoners of war and those missing in action, a ceremonial cake cutting, and other formalities will take place throughout the evening. Maj. Gen. Mark Brown, Air Education and Training Command Deputy Commander and former 14th Mission Support Group Commander, is the guest speaker for the event. Brown's current responsibilities include recruiting, training and educating Air Force personnel.

The 41st Army Band, the "Governor's Own," from Jackson, Mississippi, will play a set for the formal part of the evening but after dinner, formal toasts and the guest speaker's speech, a live DJ will play for about two hours after the formal portion of the ball.

Transportation will be available throughout the night for members to ride from base to the Trotter center and back. The van will pick people up in the Columbus Club parking lot. The van will begin running at 5:15 p.m.

Child care will be available for \$20 per child at the Child Development Center, for children 5 years old and younger; and the Youth Center, for children 6 years old and older. Register children by Sept. 13 by calling the CDC at 434-2479 or the Youth Center at

Tickets can be purchased at http://buytickets.at/ columbusafbafbirthdayball/104296. The price is \$45 for all commissioned ranks, E-6 and up, and \$25 for E-5/GS-7 and below. For further questions, please contact your unit representative.

Women's Equality Day

Produce Pilots, Advance Airmen, Feed the Fight

1st Lt. Hannah Ferrarini

14th Flying Training Wing Equal Opportunity Office

In 1971, Congress passed legslation to officially recognize Aug. 26 as Women's Equality Day. This year is no different.

This year marks the 97th anniversary of the ratification of the 19th Amendment to the U.S. Constitution giving women the right to vote which was passed on Aug. 26, 1920.

Although a victory, this miletone was not achieved without lengthy and difficult struggle 63 which took decades of agitation and protest to accomplish. Beginning in the mid-19th century, several generations of women's suffrage supporters lectured, wrote, marched, lobbied and practiced civil disobedience to achieve what many Americans

consider a radical change to the U.S. Constitution. Since the ratification of the 19th Amendment, there have been many milestones marking continued progress towards equality. Here are some of those milestones:

1948: Congress passes the Women's Armed Service Integration Act granting women permanent status in the military with the authority and regulation and entitlement to veteran's benefits.

1963: President John F. Kennedy signs the Equal Pay Act in an effort to remove the gender pay gap where women earned 59 cents for every dollar

1968: The Equal Employment Opportunity Commission revises the definition of sex discrimination to make clear that "help wanted" advertisements that use "male" or "female" headings are in direct violation of Title VII of the Civil rights Act of 1964.

1981: The Supreme Court overturned the law that states a husband is 'head master" of his wife's property.

2015: For the first time in the 65-year history of the Army Ranger tab, two women graduated from the grueling 62-day course with the same trials as their male counterparts

It is clear that women have made great strides toward equality since the passing of the 19th Amendment in 1920. As we celebrate women's equality at Columbus Air Force Base, let us reflect upon the progress we have made within the Department of Defense to strengthen the total force through equal opportunity for both men and women. Today, we proudly acknowledge that women can serve in any capacity in the U.S. armed forces. Women are an integral part to our diverse Air Force, and it is this diverse force that makes us stronger. In the words of A.M. Kurta, performing the duties of Under Secretary of Defense for Personnel and Readiness:

"From the picket lines to the front lines of combat, women of the past and present have served and sacrificed tremendously to pave the way for future generations of Americans to pursue and achieve their dreams."

(Editor's note: The following article has information used from www.deomi.org.)

SELFRIDGE AIR NATIONAL GUARD BASE, Mich. — Two thousand feet up and flying over the forests of Alpena County, Capt. Brett DeVries was running through his mental checklist and most of the options were bad. With his wingman flying just feet away and an Air Force maintenance specialist patched in via a radio set up next to a speaker phone, DeVries made the decision to land his badly-damaged A-10 Thunderbolt II on the runway at the Alpena Combat Readiness Training Center.

Despite the fact that his landing gear wouldn't come down. And the canopy had blown off the aircraft 25 minutes before. And his main radio stopped working. Along with the first back-up.

There's an old saying in the Air Force: Any landing you can walk away from is a good landing.

In this case, DeVries expeditiously exited the aircraft — gulping deep breathes until he was certain there would be no explosion. But yes, it was a very good landing.

DeVries made the landing on the afternoon of July 20 at the Alpena Center, which shares a runway with the Alpena County Airport in northeast Michigan. It is believed to be the first time in the roughly 40-year history of the A-10 that a pilot had to land with no canopy and with the landing gear up. While the aircraft sustained heavy damage, the pilot, his wingman and all the people on the ground were unharmed when the drama came to an end.

"To this day, I really haven't second guessed anything," said DeVries, leaning forward in a chair in a side office at the 107th Fighter Squadron operations building at Selfridge Air National Guard Base, where he has been flying A-10s with the Michigan Air National Guard for the past seven years. "In that moment, your training kicks in. The training — that's what saves you and your wingman."

It started off as a routine training flight from Selfridge to the Grayling Air Gunnery Range on a clear-sky Thursday afternoon in July. Four A-10s were headed up to make the 30-minute flight to Grayling, to drop dummy bombs and make several strafing passes with the 30mm GAU-8 Avenger Gatling-style gun that protrudes from the nose of the A-10.

The A-10, developed late in the Vietnam-era as a deterrent for Warsaw Pact tanks during the Cold War and universally known as the Warthog for its lovable ungainly ap-

'No Second Guesses:' Selfridge pilots share story of emergency landing

Capt. Brett DeVries, an A-10 Thunderbolt II pilot of the 107th Fighter Squadron from Selfridge Air National Guard Base, Michigan, poses next to the aircraft he safely landed after a malfunction forced him to make an emergency landing July 20, 2017, at the Alpena Combat Readiness Training Center.

attack workhorse. A squadron of the aircraft have been stationed at Selfridge since 2009, not long before DeVries, a former enlisted

For DeVries and his peers in the 107th, known as the "Red Devils," flights up to Grayling in northern Michigan are routine affairs — comparable to another day of batting practice for baseball players. DeVries es-Grayling some 300 times — training missions that came in handy during his 119 combat missions flown overseas. And training that turns anything but.

The four aircraft made six bomb passes over the gunnery range, dropping their ordinance. Then each took a turn firing the 30mm gun. Everything was just as expected - just another day of batting practice.

But on his second pass, DeVries' gun malfunctioned. Simultaneously, the canopy of his aircraft blew off. With the canopy off and flying at about 325 knots, the wind caught in his helmet and slammed DeVries' head back into the seat.

"It was like someone sucker punched me," he said. "I was just dazed for a moment."

At the time, he was flying at about 150 feet. The Airman instinctively pulled back on his stick to gain altitude. Climbing up to 2,000 feet to put some space between his aircraft and the ground.

pearance, is the Air Force's air-to-ground non Vickers, another 107th pilot. He saw a "donut of gas" from the gun around Devries' aircraft, but didn't see the canopy blow off. Vickers was making his own strafing pass and Airman, earned his commission and went to was focused on the targets at the range. The first indication for Vickers that something was wrong was when DeVries climbed to altitude out of the normal path for range traffic.

Inside his cockpit, DeVries operated on instinct drummed into him from those past training missions. First, he lowered the seat timates that he's flown training missions over in the cockpit — with no canopy, he needed to sit lower to try to escape the winds that were buffeting his head back and forth. With a lower seat and his head down, he was able can come in handy on a sunny afternoon to escape the worst of the wind. The wind in northern Michigan when a routine flight also meant that his maps and checklists were blowing all around.

"There was paper everywhere. And I was afraid to open up my emergency checklist, because I knew that would just blow away and maybe get sucked in to an engine," DeVries

Another issue as the pilot assessed the emergency: had the blown canopy in any way compromised the integrity of the ejection seat? If DeVries pulled the handles, would the ejection system fail — or worse, operate only partially, leaving him halfway in and halfway out of the Warthog?

With DeVries getting his aircraft under control, Vickers flew under him, performing a visual inspection of the damaged aircraft. When the gun malfunctioned, it blew several covers off the bottom of the A-10. The two pilots quickly conferred, with DeVries mak-Flying behind DeVries was Major Shan- ing it clear that while Vickers' opinions were

highly valued, DeVries would be making the final call about ejecting or trying to land.

"I didn't want him to feel like he would be in a position where he told me to do something and it didn't work. I wanted his full, honest input," DeVries said.

In addition to having been an A-10 pilot for the past 10 years, Vickers brought a little extra knowledge to the table. The Michigan native started his military career as an enlisted weapons specialist, working on A-10s at the 110th Attack Wing in Battle Creek.

Quickly, the two Red Devils determined the best course of action would be to fly over to Alpena, just a few minutes away by air, and attempt a landing there. While flying there, the Alpena control tower called down to Selfridge, some 250 miles to the south, in metropolitan Detroit. Soon, several A-10 maintenance specialists were on a speaker phone, chiming in with their ideas and recommendations, which Alpena then relayed to Vickers and DeVries, who was now down

to using his third-best radio system. For seemingly long minutes, they debated about DeVries attempting to lower his landing gear. Landing a plane with the gear down is good. Landing with it up is not ideal. Landing with some of it up and some of it down, well, those stories seldom end well.

Finally, with Vickers flying little more than an arm's length away underneath DeVries, the pilot of the damaged Warthog tried to lower his landing gear. Two things were in Vickers mind at the time — needing to sound off immediately if there was any problem with the gear as it began to lower and the very real concern that some loose or broken part might fall off DeVries' plane and damage Vickers'.

DeVries reached forward and grabbed the lever affixed with a clear plastic stroller wheel in the cockpit of his damaged bird. He pushed it down. And the gear started to come down, but, as they feared, the nose gear was hung up from the gun damage.

Quickly, Vickers shouted into the radio — "Gear up!" Fortunately, the gear all returned

"I just thought, 'There is no way this is happening right now.' It all was sort of surreal, but at the same time, we were 100 percent focused on the task ahead of us," Vickers said.

And so, with gear up and the canopy off DeVries lined it up for a landing.

"As he made final approach, I felt con-

fident he was making the right decision," Vickers said. "We had talked through every

'Fight and save:' French exchange pilot reaches multinational dream

Senior Airman Greg Nash 23rd Wing Public Affairs

MOODY AIR FORCE BASE, Ga. — Allured by the distant chopping of helicopter blades, a young French boy diverts his attention from his television screen to watch native pilots rescue stranded hikers in Southeast

Glancing back at his favorite show, he notices an American pilot navigating a similar airframe, causing him to wonder what it would be like to fly a 'chopper.'

Through sheer determination, Commandant Micka propelled himself to serve and fly for both nations. As part of the 67th Helicopter Squadron "Pyrenees", Cazaux Air Base, France, he was proud to 'Fight and Save,' fulfilling the French air force helicopter community's mantra. Now, he's a part of Moody Air Force Base's 41st Rescue Squadron to contribute to their motto.

"So That Others May Live,' is a (motto want to honor during my tenure here and I'm proud to represent my country as the only current French exchange pilot in the (U.S.) Air Force," said Micka. "I was very excited to join the 41st RQS because of the mission similarities with my unit back home and also the United States' and France's rescue history

"I've seen the HH-60G Pavehawk throughout my deployments and the ability to now fly one is special," Micka added, who is the 41 RQS assistant director of operations and an HH-60 pilot. "It resembles and maneuvers a lot like my old airframe, the (French air force's) EC-275 Caracal."

aircraft likeliness, he relished the two nation's lengthy experience and capabilities in performing in hostile environments and highlighted the 100th birthday of the nation's ka's) expertise into our own programs." being brothers in arms during World War I.

"I've always appreciated how the Americans aided France and also helped change the tide of the war," said Micka. "Understanding the historic close relationship and similar mantras between these nations is very dear

Knowing his dedication of this symbolic relationship and his eagerness to learn to be a better pilot and wingman, one 41 RQS member speaks on how the unit has embraced

"(Micka) has proven and continues to prove he is an excellent ambassador for our it's the best feeling in the world." French rotary wing partners," said Lt. Col. Chris Richardson, the 41 RQS commander. ity to become a more proficient pilot during

Commandant Micka, a French exchange pilot and assistant director of operations for the 41st Rescue Sauadron, stands in front of an HH-60G Pavehawk, Aug. 2, 2017, at Moody Air Force Base, Georgia. Prior to his arrival at the 41st RQS, Micka transitioned from flying the French air force's EC-725 Caracal helicopter to learn the HH-60. Since his childhood. Micka aspired to serve and fly for the French and U.S. military as a rescue pilot.

"He consistently, much like his predecessors deployments. According to him, one aspect before him, brings outstanding insight, credibility and experience to our squadron. His interactions with the (combat search and rescue) community, more specifically, the 41 RQS, are instrumental in building a bigger, more holistic approach to how we conduct nity to build relationships, share tactics and and execute our mission.

"For as long as this partnership has been around, this squadron and our community continues to reap the benefits of experiencing how each respective partner and individual unit integrate into and provide capability According to Micka, in addition to the to the joint fight," Richardson added. "This exchange program allows (U.S. Air Force) members to work with our French partners, while also allowing us to incorporate (Mic-

> Throughout his career, Micka said he's gratified to have flown over 2,000 flight hours, completed 650 missions in hostile territory and participated in 13 deployments, but nothing yet compares to his first save.

"My first save was of a wounded Afghan child when I was a young co-pilot in this unit," said Micka. "It was such an adrenaline rush and special moment for me. You don't realize the impacts of everything you're accomplishing on a mission because you're so in the moment. When you land and think about all the training you did to save someone's life,

Another great feeling for Micka is the abil-

of accomplishing this doesn't always involve maneuvering the controls in the cockpit.

in an international coalition environment to achieve one goal," said Micka. "The opportufamiliarize myself with the 30 nations I've deployed alongside with has been great."

"There's nothing like being (entrenched)

Micka credits this exposure of different

nation's aircraft and pilots for helping him prepare for his biggest challenge thus far.

"Overcoming the language barrier and improving my minimal English skills has been one of the hardest tests for me since my arrival (at Moody AFB)," said Micka. "Over time, I've sufficiently progressed through the process by getting accustomed to hearing different accents in flight and in the simulator, reading emails and talking with my com-

As the 41 RQS ADO, Micka recently finshed his HH-60 qualification training. In the near future, he hopes to accomplish his main desire as part of the exchange program.

"One of the biggest purposes of the program is to deploy to save lives and brag about your combat experience," said Micka. "It's been my favorite part of the job since I've started. I'm doing the same mission I love, just in a different unit."

Micka added that the program is so much more than one pilot getting to experience another country's tactics and training. According to him, it's also about being able share what he's learned.

"I hope to take my experiences back home to better help the 67th Helicopter Squadron," said Micka. "My next goal is be their squadron commander and overall serve in the Air Force for as long as possible. Being open-minded and embracing challenges never mind helped me succeed. It hasn't been an easy process, but it's all definitely been worth

Commandant Micka, a French exchange pilot and assistant director of operations for the 41st Rescue Squadron, actuates switches in a HH-60G Payehawk, Aug. 2, 2017, at Moody Air Force Base, Georgia. Prior to his arrival at the 41st RQS, Micka transitioned from flying the French air force's EC-725 Caracal helicopter to learn the HH-60. Since his childhood, Micka aspired to serve and fly for the French and U.S. military as a rescue pilot.

BLAZE Hangar Tails: A-29 Super Tucano

The A-29, aka the Embraer EMB 314 Super Tucano, is a turboprop aircraft designed for light attack, counter insurgency, close air support and aerial reconnaissance missions in low threat environments, as well as providing pilot training.

The Super Tucano was designed to operate in high temperature and humidity conditions in extremely rugged terrain. The Super Tucano is highly maneuverable, has a low heat signature, and incorporates fourth generation avionics and weapons system to deliver precision guided munitions.

General characteristics

Crew: Pilot plus one navigator/student in tandem on Martin Baker Mk 10 LCX zero-zero ejection seats

Payload: 1,500 kg (3,307 lb) **Length:** 11.38 m (37 ft 4 in) **Wingspan:** 11.14 m (36 ft 6.5 in) **Height:** 3.97 m (13 ft 0.25 in) Wing area: 19.4 m² (208.8 sq ft) **Empty weight:** 3,200 kg (7,055 lb) Max. takeoff weight: 5,400 kg (11,905 lb) Maximum speed: 590 km/h (319 knots, 367 mph)

Cruise speed: 520 km/h (281 knots, 323 mph) Stall speed: 148 km/h (80 knots, 92 mph)

g-limit: +7/-3.5 g)

Range: 720 nmi (827 mi, 1,330 km)

Combat radius: 550 km (300 nmi, 342 mi) (hi-lo-hi profile

1,500 kg (3,300 lb) of external stores)[174] Ferry range: 1,541 nmi (1,774 mi, 2,855 km) [175]

Service ceiling: 10,668 m (35,000 ft) Rate of climb: 24 m/s (1600 fpm)

The 81st Fighter Squadron trains Afghan Air Force pilots at Moody AFB, and to date 17 pilots and 48 maintainers have been trained and have returned to Afghan-

ALS class treated to lunch

14th Flying Training Wing Public Affairs

Members of Columbus Air Force Base Airman Leadership School Class 17-6 were treated to lunch Aug. 19 at the U.S. Army Corps of Engineers Stennis Lock and Dam East Bank in Columbus.

The Columbus Chamber of Commerce's Military Affairs Committee and the local chapter of the Air Force Association hosted the event. The class and their families were also joined by several commanders, superintendents, first sergeants and their families.

ALS instructors travel to Columbus AFB from Maxwell AFB, Alabama, twice a year to hold the five-week course, saving the Air Force substantial travel dollars. The MAC and the AFA then team up to host the classes for a picnic at an off-base recreational facility to help introduce the members to a part of the community they may have yet to visit.

LEFT: Members of Columbus Air Force Base Airman Leadership School Class 17-6, 14th Flying Training Wing leadership and others pause for a picture during a picnic Aug. 19, 2017, at the U.S. Army Corps of Engineers Stennis Lock and Dam East Bank in Columbus, Mississippi. The Columbus Chamber of Commerce's Military Affairs Committee and the local chapter of the Air Force Association hosted the event.

Leadership structure is adaptable

Maj. Doug Hickey

14th Force Support Squadron Commander

The topic of "leadership" is nothing new to the military environment, rather its basic structure is the foundation of success in various arenas. As creatures of habit, we tend to follow the typical hierarchical arrangement focused on lines of authority, communication, rights and duties of an organization.

This approach seems to be a pretty standard template, however, subjectivity must come into play in terms of how leadership is demonstrated and cultivated in the organization by individual leaders at all levels in response to the multitude of variables faced on a daily basis.

I am a firm believer that things do need structure, but will also note that we need to be adaptable and willing to change in order to make improvements and achieve success.

vice business, are experiencing this necessity for change first hand in the form of a Force Support Squadron restructure across the Air this move to a more horizontal structure has

I am a firm believer that things do need Force which is likely unknown to other career structure, but will also note that we need to fields. As part of this process, we are moving be adaptable and willing to change in order from a current structure having five flights to to make improvements and achieve success. a flatter structure of nine distinct flights with Status quo is no longer something viewed as the intent of providing both additional leadacceptable in the business industry. We, in ership and career development opportunities the Force Support Squadron, a customer ser- to the military and civilian workforces and removing unnecessary layers of management.

According to Forbes Magazine studies,

pects of organizations, tear down "structural" walls, help streamline communication and collaboration within the workplace, empower staff, and improve networking.

Subjectivity comes into play when leaders exercise their right to determine when command and control, teamwork, and change are necessary. In essence, we must come to terms with the fact that the way we work is changing and be willing to take risks and challenge outdated ways of doing things.

In closing, some form of structure is key to stability is all aspects of life, but we cannot be blind to the fact that change is also necessary. The world is changing around us. Embrace it and enjoy the ride.

Afghan Air Force A-29 Training Extended to 2020

23rd Wing Public Affairs

MOODY AIR FORCE BASE, Ga. — The Secretary of the Air Force approved the Afghan Air Force A-29 training program to be extended nere until Dec. 31, 2020

This extension is based on the Afghanistan Air Force receiving six additional A-29 Super Tucano aircraft driving requirements for nine more pilots and 20 maintainers.

Since 2013, the United States Air Force has procured 20 A-29 aircraft for training and operational use by the Afghan Air Force. Training for these aircraft is conducted at Moody Air Force Base per a June 2014 strategic basing decision.

To support the training mission, the 81st Fighter Squadron was established in October 2014 and students began training in February 2015. The training plan was designed to produce 30 pilots and 90 maintainers through December 2018. To date, 17 pilots and 48 maintainers have been trained and have returned to Afghanistan.

For additional questions please contact Moody Air Force Base Public Affairs at 229-257-4146.

1980 - 1990 GENERATION

US Air Force: Technology Milestones for 1980s

Missiles, Missile Defense, Tactical Missiles, and Related Technology

January 11, 1981: The Boeing Company delivered the first USAF air-launched cruise missiles to the 416th Bombardment Wing at Griffiss Air Force Base, New York. Capable of delivering a nuclear weapon to a target 1,500 miles away, the new missiles contained a terrain-contour-matching system that allows extremely low-altitude flight to avoid detection by enemy radar. (Haulman)

May 2, 1981: An airborne laser destroyed an aerial target for the first time when the Airborne Laser Laboratory (ALL), a modified KC-135 aircraft armed with a carbon dioxide laser, shot down a drone over White Sands Missile Range, New Mexico. Two years later, the ALL successfully shot down five Sidewinder air-to-air missiles, proving its utility as an antimissile system. (Haulman)

October 2, 1981: President Ronald Reagan announced that the M–X missile would be deployed initially in existing missile silos. (Haulman)

vated the 501st Tactical Missile Wing at Royal Air Force Greenham Common, United Kingdom. This unit was the first of six ground-launched cruise missile wings in Europe.

February 3, 1983: To modernize America's retaliatory operations in Antarctica. (Haulman) capability, Strategic Air Command completed the retrofitting of 300 Minuteman III intercontinental ballistic missiles with new reentry systems. (Haulman)

July, 1984: The first Harpoon (AGM-84) missile was delivered to the 69th Bombardment Squadron, 42d Bombardment Wing, Loring Air Force Base, Maine. B-52s could launch the missiles to destroy enemy ships. (Haulman)

August 28, 1984: A C-5 Galaxy arrived at Florennes Air Base, Belgium, with the first shipment of support equipment for ground-launched cruise missiles in Europe. (Haul-

August 23, 1985: Air Force Systems Command successfully conducted its first "cold launch" from an underground silo, a modified Minuteman launch facility at Vandenberg Air Force Base, California. The cold-launch technique ejected the missile from the silo by gas pressure, and the propellant ignited after it became airborne. This technique caused less damage to the silo and reduced the time needed for another launch. (Haulman)

June 19, 1986: All USAF Rapier surface-to-air missile units in Europe became operationally ready. (Haulman)

October 10, 1986: The Air Force placed the LGM-118A, also called the Peacekeeper or MX missile, on alert duty. Each of these new intercontinental ballistic missiles could deliver warheads to 10 different targets. (Haulman)

December 8, 1987: The United States and the Union of Soviet Socialist Republics signed the Intermediate-Range Nuclear Forces Treaty, agreeing to remove all intermediate-range (620–3,415 statute miles) missiles from Europe.

The agreement resulted in the inactivation of six USAF the U-2 reconnaissance aircraft could conduct all-weather tactical missile wings equipped with ground-launched day-and-night missions at altitudes exceeding 70,000 feet. cruise missiles. (Haulman)

May 5, 1987: Strategic Air Command removed the last liquid-fueled Titan II missile from alert duty at Little Rock Air Force Base, Arkansas, ending the operational life of the nation's largest intercontinental ballistic missile and the last one with liquid fuel. (Haulman)

May 4, 1990: The AIM–120A advanced medium-range air-to-air missile passed its final flight test for use on U.S. fighters. (Haulman)

New Aircraft Technology

March 17, 1981: McDonnell Douglas Aircraft Company delivered the first KC-10A Extender tanker/cargo aircraft to Strategic Air Command. Substantially larger than the KC-135 tanker/cargo aircraft, the Extender not only could carry more fuel and cargo, but also could refuel more types of aircraft, including other KC-10s. On June July 1, 1982: United States Air Forces in Europe acti- 21, 1982, Strategic Air Command conducted a successful aerial refueling only 750 miles from the South Pole. During this southernmost in-flight refueling, a KC-10A Extender transferred 67,400 pounds of aviation fuel to a Military Airlift Command transport that was conducting resupply

The primary mission of the KC-10A Extender was aerial refueling, but it also carried cargo and passengers.

June 18, 1981: The F–117 Nighthawk, the world's first stealth combat aircraft, flew for the first time. Hal Farley piloted the revolutionary aircraft, which presented very little radar image, at Tonopah Test Range, Nevada. (Haulman) By 1983, the Air Force declared the system operational, and by 1986, thirty-six F-117s had been delivered, with the remaining twenty-six delivered by July 1990. (Dr. Paul G. Kaminsky) On November 10, 1988, the Air Force revealed the F–117 stealth fighter to the public for the first time. Manufactured by Lockheed, the F-117 could evade most radar detection with its radical shape and radar-absorbent **Sources**

heed-California, this improved and enlarged version of Press, 2003.

September 6, 1976: A Soviet pilot landed his MiG-25 Foxbat jet fighter in Hokkaido, Japan, and asked for asylum in the United States. Japanese and U.S. officials closely examined the aircraft and on November 15, returned it, dismantled, to the Soviet Union.

November 5, 1981: The first operational EF-111A defense-suppression aircraft was delivered to the 388th Electronic Combat Squadron at Mountain Home Air Force Base, Idaho. The EF-111A would eventually replace EB-66 and EB-57 aircraft to provide worldwide support of tactical air strike forces. (Haulman)

January 8, 1986: Military Airlift Command accepted delivery of its first C-5B Galaxy, an improved version of the C-5A, at Altus Air Force Base, Oklahoma. On October 4, 1989, a 60th Military Airlift Wing crew landed a C–5B Galaxy in Antarctica for the first time. With a load of 72 passengers and 84 tons of cargo, including two fully assembled Bell UH-1N helicopters, the huge aircraft landed without skis at McMurdo Station. (Haulman)

August 23, 1990: The 89th Military Airlift Wing received the first of two Boeing VC-25A presidential transport aircraft at Andrews Air Force Base, Maryland. The VC-25A was a modified 747-200B commercial transport that replaced the VC-137C for service as Air Force One. (Haulman)

September 1, 1982: The Air Force activated Space Command, redesignated Air Force Space Command on November 15, 1985, following activation of United States Space Command—a joint organization—at Peterson Air Force Base, Colorado, on September 23, 1985. Between April 1 and May 1, 1983, the Air Force transferred 31 units and four installations from Strategic Air Command to Space Command, which took over missile warning and space surveillance systems. (Haulman)

September 13, 1985: The first antisatellite intercept test took place when a weapon launched from an F-15 successfully destroyed a satellite orbiting at a speed of 17,500 miles per hour approximately 290 miles above Earth. (Haulman)

June 14, 1989: On its first launch, the Martin Marietta Titan IV heavy-lift booster, nearly 20 stories tall, successfully lifted a Defense Department satellite into orbit

Daniel L. Haulman, One Hundred Years of Flight: USAF September 15, 1981: Strategic Air Command received Chronology of Significant Air and Space Events, 1903–2002. its first TR-1A reconnaissance aircraft. Built by Lock- Air Force History and Museums Program and Air University
