Columbus AFB History

On June 26, 1941 the War Department approved establishment of an Army Airfield for pilot training in the Columbus area. On Aug. 12, 1941, Columbus officials leased the tract of land to the United States for \$1 per acre per year. The base began as a training facility for fighters and bombers, controlled by Southeastern Air Corps Training Center at Maxwell Field, Alabama. On Jan. 13, 1942, 100 enlisted men arrived to form organizations on the base.

In 1942 the installation was named Kaye Field (pronounced "coy"), in honor of Capt Sam Kaye, a World War I flying ace from Columbus, but due to confusion with another airfield the name changed to Columbus Army Flying School in March of 1942. That year, 25 cadets entered training on Feb. 9 and graduated on March 6.

During World War II, 7,412 students received their wings and commissions at CAFS. During this time, they trained in the AT-8, AT-9, AT-10, and B-25. When the war ended in 1945, the base reached a peak of 2,300 enlisted men, 300 officers, and an average of 250 pilot cadets per class. The end of hostilities slowed training and in 1946 the base was inactivated.

Air Training Command activated Columbus AFB on Dec. 20, 1950 to handle increased pilot demand for the Korean War. ATC established the 3301st Training Squadron (Contract Flying) on March 1, 1951.

On April 1, 1955, HQ USAF transferred Columbus AFB from ATC control to Strategic Air Command (SAC) and Second Air Force. The base became the home of a B-52 squadron and a KC-135 jet refueling tanker squadron under the 4228th Strategic Wing.

In 1963, SAC inactivated the 4228th Strategic Wing and activated the 454th Bombardment Wing, Heavy. They conducted air refueling operations and trained in bombardment operation at Columbus AFB.

HQ USAF transferred Columbus back to ATC and its original mission of training pilots on July 1, 1969. ATC activated the 3650th Pilot Training Wing on Feb. 15. The first class, 71-01, entered training on July 17, 1969 flying the T-37 "Tweet" and the T-38 "Talon."

On June 1, 1972, ATC discontinued the 3650th and activated the 14th Flying Training Wing, which continues today as the home of the world's premier pilot training.

In the mid-1990s, Undergraduate Pilot Training (UPT) became Specialized Undergraduate Pilot Training (SUPT) with the addition of the T-1A "Jayhawk." The first tanker and transport trainer aircraft arrived on January 25, 1996. Columbus AFB received the T-6A Texan II on October 12, 2006 and on April 2, 2008, the T-37 was officially retired.

On May 19, 2007, the 49th Fighter Training Squadron returned to CAFB from Moody AFB to teach the Introduction to Fighter Fundamentals program in the T-38C.

The 14th FTW activated the 81st Fighter Squadron at Moody AFB, GA on Oct. 1, 2014. The 81 FS, a geographically separated unit of the 14th FTW, trains pilots and maintainers from Afghanistan and Lebanon on the A-29 Super Tucano. These aircraft will return with the trainees to be flown in their home country.
